A Visit to Organic Farm

Sutturu: The Organic farm is likewise set up every year. When compared to last year organic farm is quite different because the fertilizers have been not used. They give much importance to medicinal plants, kinds of medicine plants And have been planted about 45 to 50

kinds, for example insulin, chakra muni, hibiscus etc. Organic fertilizers are used to grow the plants and vegetables. The main aspect is that it helps the farmers to grow vegetables and crops without using chemical fertilizers. So mainly this helps the farmer's wealth. The organic farm is

under Mr.Malluswamy of Kuppurali (KVK). According to him medicinal plants they grow peanuts, soybeans, double bean, mustard, sesame, etc and they grow around 117 kinds in around 1 1/2 half acres.

Living these kinds of crops they use to grow different kinds of flowers like maxi mile, zinnia, marigold, and compare to last year this year they planted wheat. Before 3months of this fair get started they use to grow these verities. The verities of fertilizers used are; DIP2020 and 1717 AND potation and before the growing the crop they use earthworm fertilizers. also

The organic farm is mainly incharged by Mr.shamraj (JSS research center sutturu) he is

working as a scientist from last 6 years. The main intention of this work is to get formers a better and good yield. Since from 6years he handles a 1 acres of land to grow a crops and verities of vegetables.

They have a KVK agro clinic in nearby suture village centre. The main intention of the clinic is to sale the organic product for the reasonable prize for the farmers. The fertilizers have been sold there is basically out of chemical products. The fertilizers are mixed with water and can be used. And they used train the farmers Mainly this seeds are provided by Sahaja samrudha organic producer company Ltd from Bangalore
